Ms. Georlyn Bayugao
Human Resources Department
Texas Instruments Philippines
Loakan Road, Baguio City

Dear Ms. Bayugao,

I am writing to express my strong interest in the IT Analyst position at Texas Instruments Philippines. As a recent Bachelor of Science in Information Technology graduate from STI College Baguio, I have developed a robust foundation in systems analysis, full-stack web development, and network architecture, which aligns directly with the technical and analytical demands of your IT team.

Throughout my academic career, I have gained hands-on experience designing, testing, and implementing functional software and network solutions. For my capstone project, VeriSpace Baguio, I built a complete web platform using ASP.NET Core MVC, successfully managing user authentication, controller routing, and backend database integration via SQL Server Management Studio. Additionally, I developed a desktop kiosk application, Jack's Kitchenette Order App, utilizing C# WinForms to create an intuitive cashier interface and reliable database connections.

My technical toolkit also includes responsive front-end development using HTML, CSS, Bootstrap, and JavaScript, as well as backend processing in Java and Python. Beyond software engineering, I have practical exposure to analyzing enterprise network topologies and security using eNSP and Wireshark. I am also familiar with modeling enterprise architecture frameworks using ArchiMate, allowing me to effectively map business requirements to technical infrastructure—a critical capability for an IT Analyst.

I am highly motivated to bring my troubleshooting skills, adaptability, and technical proficiency to Texas Instruments. I thrive in collaborative environments and am eager to apply my academic experience to real-world IT operations and system improvements.

I have attached my resume for your review. I would welcome the opportunity to discuss how my background, technical skills, and drive can contribute to the continued success of your team.

Thank you for your time and consideration.

Sincerely,

Hossana Villanueva
