- **Programming Languages:** C#, Java, Python, C++, HTML/CSS, JavaScript, PHP
- **Database Management:** MySQL, SQL Server (SSMS)
- **Tools & Technologies:** ASP.NET Core MVC, Wireshark, eNSP, ArchiMate, Git, Visual Studio, MS Office Suite
- **Core Competencies:** Troubleshooting, Systems Analysis, Network Security, Object-Oriented Programming, Team Collaboration, Problem-Solving

ACADEMIC PROJECTS

Capstone Project: VeriSpace Baguio
STI College – Baguio

Role: Systems Analyst, UI/UX Designer, Backend Developer

Description: Developed a residential leasing web application as a secure solution to combat social media rental scams in Baguio City.

Technologies Used: ASP.NET Core MVC, HTML, CSS, JavaScript, PHP, SQL Server, MySQL

Key Contributions:

- Programmed the blockchain feature to ensure secure and verifiable rental agreements.
- Designed the user interface and user experience, focusing on responsive layouts and intuitive navigation for property listings.

- Implemented user registration, authentication controllers, and backend database integration via SQL Server Management Studio.

Desktop Application: Jack's Kitchenette Order App
STI College – Baguio

Role: Developer

Description: Built a desktop kiosk ordering application with an integrated database for efficient transaction processing.

Technologies Used: C#, Windows Forms (WinForms), SQL Server

Key Contributions:

- Designed an intuitive cashier interface to streamline the order-taking process.
- Configured local database connections and managed database tables for menu categories and transaction records.
